

SHARK LITE

RELIABILITY
Sharklite has been designed to satisfy the needs of solidity, without neglecting design. The metallic parts are made of aluminium whereas the plastic parts are made of nylon charged with fibreglass. Robust and not perishable, the product resists oxidation, bad weather, heat and UV radiation.

ART.712N INDENT ONLY
ART.718N

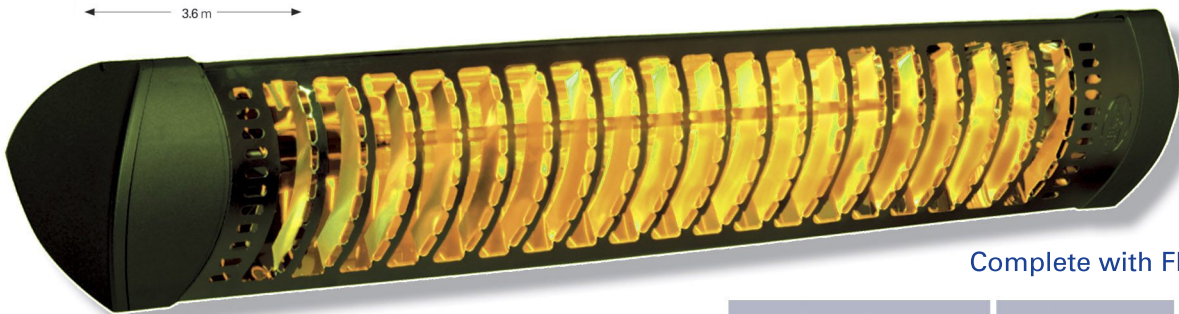

made in Italy

SAFETY

The degree of dust protection is IP55. Resistance to shocks is guaranteed by a robust grille and the use of silicone.

TECHNOLOGICAL INNOVATION

The production of essential elements, such as the parabolic reflector and the protection grille is realised thanks to an innovative system which uses projected curvilinear bends. This technique increases the rate of irradiation and at the same time reduces costs and weight in comparison to traditional systems.

Complete with Flex & Plug
